KEY SKILLS

- PHP
- HTML & CSS
- Teamwork skills
- Leadership skills
- ICT skills
- High work ethic

- Java
- Logical thinking
- Written and verbal communication
- JavaScript
- Proficiency on Microsoft Office
- Attention to detail

PERSONAL STATEMENT

My passion for web development began when I was in sixth form. As part of my AS IT course I was tasked with making a very basic website using HTML and CSS. My enjoyment of this eventually brought me Apprentice Web Developer. While here, I learnt about the different frameworks used within web development, one of which was a CSS framework called Bootstrap, and a PHP framework called WordPress which is where I first began to learn to code in PHP. Since coming to Northumbria University, my knowledge in HTML, CSS and PHP have drastically improved. Classroom learning allowed me to understand the foundations of these languages and given me a greater understanding and will allow me to understand how to use frameworks in a more efficient way.

RELEVANT WORK EXPERIENCE

Inspired Agency Ltd, Software and Web Developer Apprentice
April 2017/2018
I worked at Inspired Agency as a Level 3 Web Developer Apprentice where I was given the chance to work with highly regarded clients such as Grainger Games, Sytner, and more. Most of my daily work involved building custom email campaigns from HTML. Towards the end of my apprenticeship, I began to learn PHP, which allowed me to progress onto some WordPress tasks ranging from basic to intermediate in difficulty. During this apprenticeship I took part in technical courses where I learnt aspects of PHP, HTML, CSS, JavaScript & C#. Here are some of the skills I took from this:

- Technical Mind.
- Team working.
- Solving Problems within code.
- Enhanced verbal and written communication.

VOLUNTARY / CHARITY WORK

NDCS, NCS Social Action Project
2014
I wanted to arrange a charity event to raise awareness of deafness due to family reasons. During a team meeting, I discussed the possibility of raising awareness and was involved in the entire project from beginning to end. Key Highlights of this experience included:

- Took a lead in the management of the project.
- Planned significant dates and venues.
- Obtaining permission to host event from the local council
- Created public notice leaflets about the campaign.
- Engaged with social media.

EDUCATION

Northumbria University, Computer Science with Web Development, BSc – *09/2018 – Present*
Grade: Working towards First Class Honours
At my time studying at Northumbria University, I have improved my skills. As this is a technical course, I have improved my programming skills in HTML, CSS, JavaScript, PHP whilst learning some new languages like SQL and Java. Learning these languages while completing assignment briefs, which are set out like a real-world scenario, has prepared me for workplace projects. During some modules, I was tasked group work. I was happy to be given tasks which I was able to focus on, bringing innovative ideas while managing to meet the pre-arranged deadlines.

Consett Academy Sixth Form, A-levels
2014/2016
Grades: 3 A-levels graded between A-D.

Consett Academy, Secondary Education
2009/2014
Grades: 9 GCSEs graded between A-C, 1 BTEC, graded Merit.

PERSONAL ACHIEVEMENT

- Nominated for an award for the NCS deaf awareness project.
- Lead acting roles in amateur dramatics group productions.
- Elected President of the Northumbria Pro Wrestling Society 2020-2021
- Became an advanced Pro Wrestling trainee in 7 months.
- Offered a managerial position at 19 years old.
